ABOUT US

Since 2005, we have grown ornamental plants at our own nursery in Yalova, Türkiye.

Quality, reliability and consistency guide our work as we cultivate plants for gardens, terraces and landscape projects.

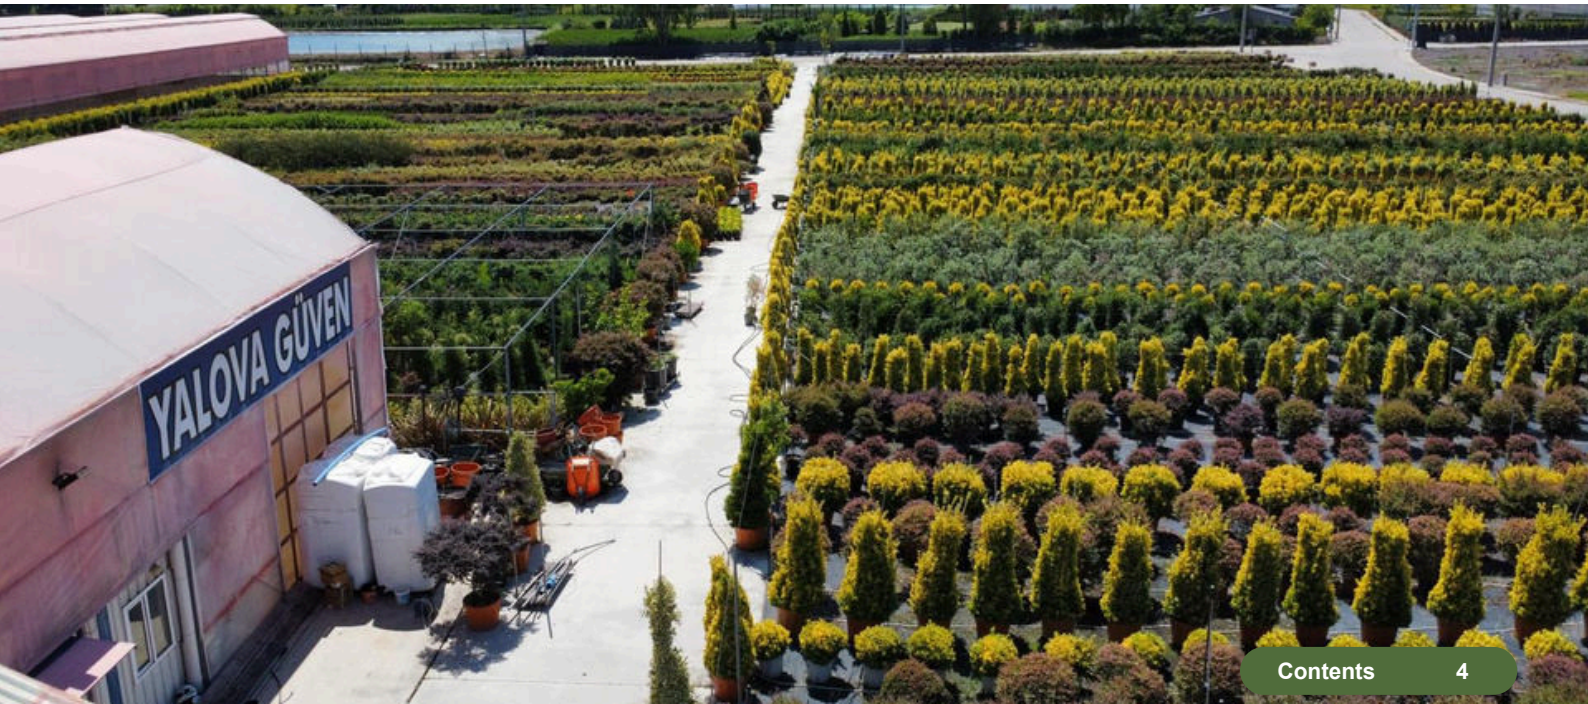

GROWN WITH CARE

At our production facilities in Yalova, we cultivate ornamental plants with care at every stage. Our growing areas reflect the time, attention and expertise behind each plant.

PROFESSIONAL PRODUCTION

Our spacious growing areas support careful cultivation and plant selection. From propagation to the finished product, we focus on quality, consistency and healthy growth.

Euonymus
japonicus
'Aureus'

Euonymus japonicus

'Aureus'

Pyramid topiary

Pot: CLT 18

Pot: CLT 35

On request

Common name: Japanese spindle
Listed height: 140-180 cm
Foliage: Yellow and green; evergreen
Light: Full sun or partial shade

On request

Golden Japanese spindle has yellow-and-green variegated evergreen foliage. Its clipped pyramid form creates a defined architectural accent for gardens, entrances and large containers. Grow in full sun or partial shade in moist, well-drained soil. Regular trimming maintains a dense, symmetrical outline.

Euonymus japonicus

'Aureus'

Pyramid topiary

Pot: CLT 55

Pot: CLT 110

On request

Common name: Japanese spindle
Listed height: 140-200 cm
Foliage: Yellow and green; evergreen
Light: Full sun or partial shade

On request

Ball topiary

Pot: CLT 160

On request

Golden Japanese spindle has evergreen yellow-and-green foliage. This ball topiary form adds year-round color and structure to gardens and containers. Grow in full sun or partial shade in moist, well-drained soil; trim to maintain its shape.

Euonymus japonicus

'Aureus'

Braided-stem standard

Pot: CLT 18

On request

Common name: Japanese spindle

Listed height: 140-180 cm

Foliage: Yellow and green; evergreen

Light: Full sun or partial shade

This standard-trained golden Japanese spindle combines a rounded crown of yellow-and-green evergreen foliage with a decorative braided stem. It creates an elegant focal point for entrances, terraces and specimen containers. Grow in sun or partial shade in well-drained soil; light trimming keeps the crown neat.

Euonymus
japonicus
'Bravo'

Euonymus japonicus

'Bravo'

Pyramid topiary

Pot: CLT 18

Pot: CLT 35

On request

Common name: Japanese spindle

Listed height: 140-180 cm

Foliage: Green and cream; evergreen

Light: Full sun or partial shade

On request

Japanese spindle 'Bravo' has glossy green leaves with irregular cream margins. Its evergreen foliage and clipped pyramid form provide year-round structure for entrances, formal borders and containers. Grow in sun or partial shade in well-drained soil, and trim to maintain the outline.

Pot: CLT 18

Pot: CLT 18

On request

Common name: Chinese fringe flower

Listed height: 150-180 cm

Foliage: Dark purple-brown

Flowers: Pink, fringed

Light: Full sun

On request

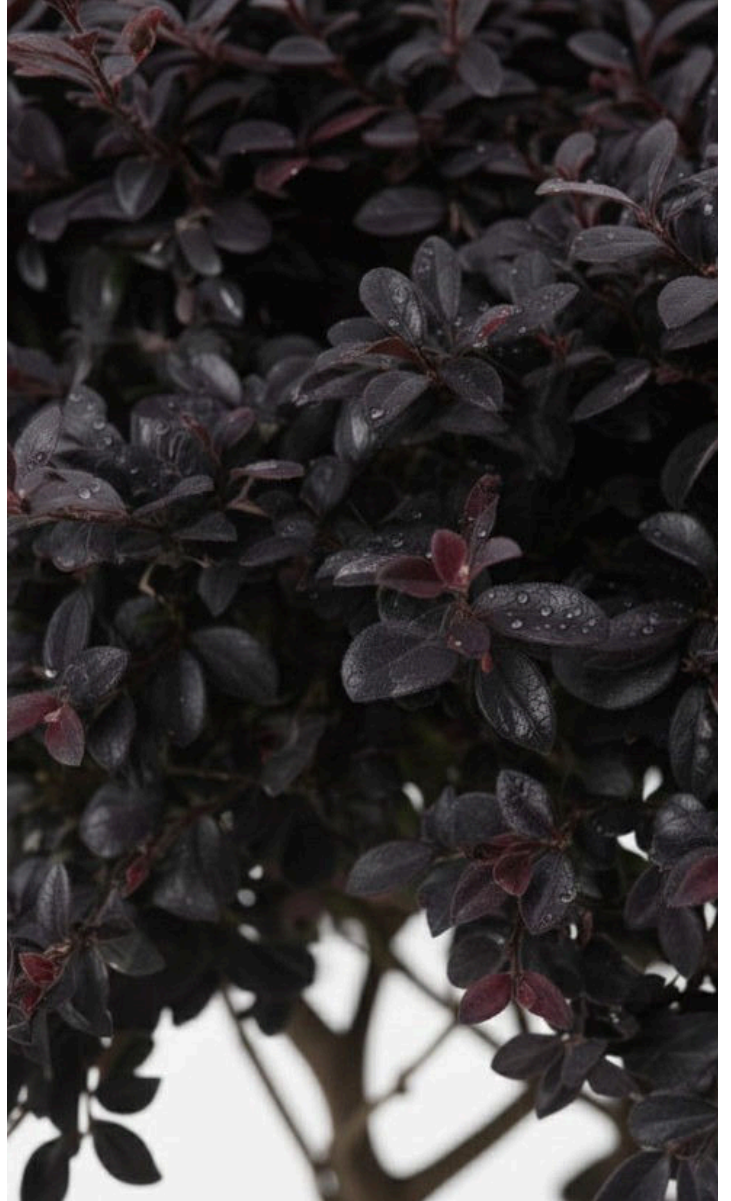

The standard form has a rounded crown on a clear stem. Chinese fringe flower 'Black Pearl' has dark purple-brown foliage and bright pink, fringed flowers. It is evergreen in mild conditions but may lose some leaves in colder weather. Grow in a sunny, sheltered position in moist, well-drained soil.

Loropetalum chinense

'Black Pearl'

Bonsai form

Pot: CLT 110

On request

Common name: Chinese fringe flower

Listed height: 150-180 cm

Foliage: Dark purple-brown

Flowers: Pink, fringed

Light: Full sun

This bonsai-style specimen has sculpted branching and a spreading crown. Chinese fringe flower 'Black Pearl' has dark purple-brown foliage and bright pink, fringed flowers. It is evergreen in mild conditions but may lose some leaves in colder weather. Grow in a sunny, sheltered position in moist, well-drained soil.

Taxus baccata

Pyramid / ball topiary

Pot: CLT 70

Pot: CLT 35

On request

Common name: English yew

Listed height: 140-180 cm

Foliage: Dark green needles; evergreen

Light: Sun, partial shade or shade

On request

English yew has dense, dark green, needle-like evergreen foliage and responds well to trimming. These trained forms provide lasting structure in formal gardens, entrances and containers. Grow in sun, partial shade or shade in well-drained soil; avoid waterlogged conditions.

Taxus baccata

Pyramid forms

Pot: CLT 35

Pot: CLT 35

On request

Common name: English yew

Listed height: 140-180 cm

Foliage: Dark green needles; evergreen

Light: Sun, partial shade or shade

On request

English yew has dense, dark green, needle-like evergreen foliage and responds well to trimming. These trained forms provide lasting structure in formal gardens, entrances and containers. Grow in sun, partial shade or shade in well-drained soil; avoid waterlogged conditions.

Taxus baccata

Upright forms

Pot: CLT 12.5

On request

Common name: English yew

Growth rate: Slow

Foliage: Dark green needles; evergreen

Light: Sun, partial shade or shade

Pot: CLT 12.5

On request

English yew has dense, dark green, needle-like evergreen foliage and responds well to trimming. These trained forms provide lasting structure in formal gardens, entrances and containers. Grow in sun, partial shade or shade in well-drained soil; avoid waterlogged conditions.

Osmanthus heterophyllus

False holly

Pot: CLT 18

On request

Common name: False holly

Foliage: Glossy green; evergreen

Flowers: Fragrant white flowers in autumn

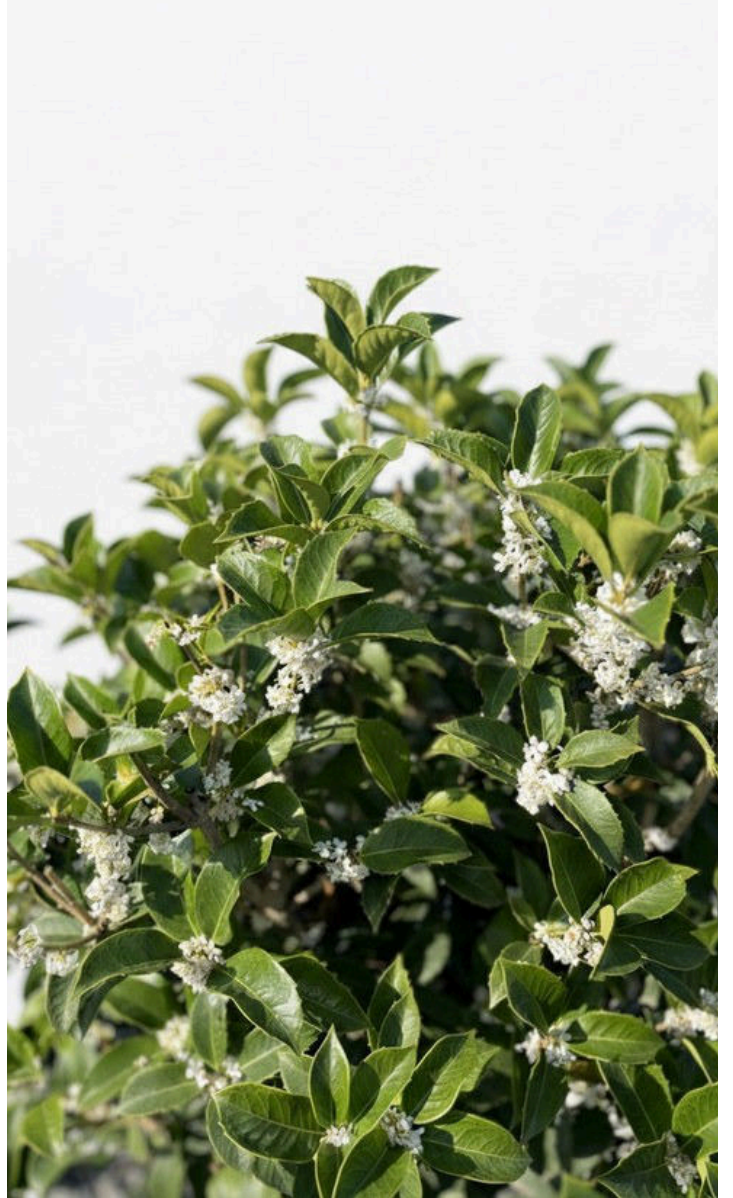

Light: Full sun or partial shade

False holly is an evergreen shrub with glossy, holly-like leaves and small, fragrant white flowers in autumn. Its dense growth suits hedges, screens and specimen planting. Grow in full sun or partial shade in moist, well-drained soil. Pruning can maintain a neat, rounded outline.

Osmanthus heterophyllus

False holly

Pot: CLT 35

On request

Common name: False holly

Foliage: Glossy green; evergreen

Flowers: Fragrant white flowers in autumn

Light: Full sun or partial shade

False holly is an evergreen shrub with glossy, holly-like leaves and small, fragrant white flowers in autumn. Its dense growth suits hedges, screens and specimen planting. Grow in full sun or partial shade in moist, well-drained soil. Pruning can maintain a neat, rounded outline.

Gardenia jasminoides

Gardenia / Cape jasmine

Pot: CLT 18

An evergreen shrub with glossy dark green leaves and richly fragrant white flowers. Grow in partial shade in moist, acidic, well-drained soil. Shelter from cold winds; ideal for patios and containers in mild climates.

On request

Viburnum tinus

Laurustinus

Pot: CLT 18

An evergreen shrub with glossy dark green leaves. Pink buds open into creamy-white flowers in late winter and spring. Grow in sun or partial shade in well-drained soil; ideal for hedges and borders.

On request

Euonymus japonicus

El Dorado

Ball topiary

A compact evergreen Japanese spindle with bright yellow young leaves that green with age. This clipped ball form brightens containers and borders. Grow in full sun in well-drained soil.
